

**Save thousands and expand your test capability range by upgrading your older hydraulic test system with ADAS.**

## THE FORMULA IS SIMPLE:

The diagram illustrates the formula for upgrading a test stand. On the left is an 'Older/Used Hydraulic Test Stand', which is a large, rusted metal cabinet with various gauges and dials. In the center is a plus sign. To the right of the plus sign is the 'Avtron Upgrade with ADAS DAQ System', which is a modern, sleek metal console on wheels with two monitors and a control panel. To the right of the console is an equals sign. To the right of the equals sign is a list of six benefits, each preceded by a checkmark.

- ✓ INCREASED PRODUCTIVITY
- ✓ EXPANDED CAPABILITY
- ✓ REDUCED COST
- ✓ ENHANCED ACCURACY
- ✓ ADDED TRACEABILITY
- ✓ INCREASED RELIABILITY

Older/Used Hydraulic Test Stand      Avtron Upgrade with ADAS DAQ System

## Extend the life of your test console

For a fraction of the cost of buying a new test stand, ADAS provides an off-the-shelf solution to address obsolescence and bring new capability to your business.

## ADAS is THE preferred DAQ platform for OEM's and MRO's

- Avtron provides turnkey solutions, or we can offer support to help you “do-it-yourself”.
- We've got a large library of component test programs available to build your capability.
- Developing new capability yourself is easy using the common test functions in ADAS.
- No need to purchase new transducers or sensors – ADAS can be configured to utilize existing fixtures and console electronics.

Avtron specializes in the assessment, planning and delivery of upgrade projects. Our experienced team understands how to get the job done with the least possible disruption to production schedules.
