# Maximize Your AVR+ Investment

As the OEM, Avtron recommends that all AVR+ systems receive an annual calibration and verification to maximize performance and maintain traceability.

Avtron is the ONLY authorized service center for the AVR+

Benefits of annual Avtron ISO 10012 -1 calibration include:

- ✓ Assure consistent quality of your production output
- ✓ Lower operating cost due to enhanced reliability
- ✓ Address quality audit and reviews
- ✓ Maintain quality of specifications
- ✓ Meet production control criteria
- ✓ NIST traceable calibration
- ✓ Verify upgrades and hardware revisions

Need New Personalities?

Avtron offers multiple emulation software upgrades to expand your AVR+ test capabilities.

- No special hardware is needed to add a personality.

- The AVR+ is used with aircraft AC and DC Generators, IDG's CSD's, VSCF, and VF Generators.

Need Repair?

Return your defective product to our OEM service center for fast and reliable repair service by one of our highly trained factory service technicians. All replacement parts are in stock.
